Los Angeles, August 16 -- 62

Dear □ □

Since I write English so badly and always have to use the dictionary, I would like to try it in German this time.

And this won't cause you any difficulties?

Well, I'm still in L.A., but I have changed my plans to go to Denver.

The university begins to pay on 1 September, so I have to be in my office by Monday Sept. 3.

For this reason, I will fulfill my hard worker obligation only until Agas August 31, Friday that is. I'll leave L.A. Friday night and be in Denver Sunday afternoon.

I could fly to Wash. D.C. on Tuesday & September; I think it's best in the afternoon. Is that O.K. with you? If not, please let me know and we can set up something else-in accordance with your wishes, of course!

Actually, I'm have in L.A. so long because I have to earn something, otherwise I could be travelling home even earlier.

You wrote in your letter that your would like to see mem at the end of the month.

I assume xxxxxxx that perhaps there is a possibility that you want to send mex to Belgrade, although you told me the opposite in Palo Alto.

The European track championships are from Sept. 7 -- Sept. 15. I'll find out tomorrow afternoon when the American track coaches will be flying there, since there is a big track meet in Culver City.

As a Chilean citizen, I can travel to B. without difficulty and, I hope, come back. Thousands of persons will be visiting B. for the E.M. /Trans. note: European championship/, and it is impossible to control and watch over everything very precisely

I would like to tell you something: it is comfortable and easy work to work under **EREXKE** completely secure circumstances. To the contrary: I have always **NEWLYMENEX** enjoyed it more where the conditions are harder and more dangerous.

I have the necessary experience and therefore: if it is important, I would like to

do it this time voluntarily. I believe that the best that we could learn from this would be the final test (5.

He told me in Palo Alto he hopes to see me in B. and my personal conviction is the definitely will bring something interesting to B.

The latter is up to you to decide and to plan. I have presented my personal thoughts and conviction. Perhaps I can recall to you the saying: "Strike the iron while it is hot."

If this should be the case, I can waxexxementer come to Denver innerintely.

and farther for discussions.

Otherwise there is nothing new. In order to earn 18 dollars a day

I have to have very many contects and breathe in gasoline and

I have to have very many contects and breathe in gasoline and

In additi

there is always the danger of burning my hands and face. Unfortunately, I haven't

found anything decent. Today I told the factory owner: "It would be much better not

to eat any potatoes at all, but rather tomatoes or something like that without peeling

The damned potatoexpeeling machine! I say

But through this I have learned a great many other things. I have got to know the American workers very well: how they live, what they think, what they feel, and what they are concerned about. Among other things, they have no interest at all about Nikolayev and Popovich. Mostly, they take delight in the fact that the bandits made off with 1.5 million dollars and they dream about known what known what they could buy with man so much money. They don't like the work either But unfortunately strength it has been set up in such a way that the facts the completely used

or even the machines start to howl. This makes the work hard, but I believe with time apathetic and indifferent.

I'm very sorry, but my financial situation is below the water line, therefore, I'll be glad if you would send me the air ticket to Denver in advance.

I'm really very sorry to say something like this, but it is unfortunately so.

Well, I hope to hear from you soon.

With best greetings

Your

B. L.

Los Anger, august 16-62
